

**Table 1. Number, median days, incidence rate<sup>1</sup> and relative standard errors of nonfatal occupational injuries and illnesses with days away from work<sup>2</sup> involving musculoskeletal disorders<sup>3</sup> by selected natures of injury or illness, New York, 2002**

Nature	Number	Median days away from work	Incidence rate	Relative standard error
Total	33,895	14	61.9	3.2
021 Sprains, strains, tears	22,921	10	41.9	3.3
0972 Back pain, hurt back	4,386	12	8.0	4.8
0973 Soreness, pain, hurt, except the back	3,642	24	6.7	5.1
1241 Carpal tunnel syndrome	774	53	1.4	9.5
153 Hernia	1,587	42	2.9	6.9
1530 Hernia, unspecified	660	21	1.2	10.2
1531 Inguinal hernia	523	46	1.0	11.4
1532 Hiatal hernia	--	--	--	--
1533 Ventral hernia	361	60	0.7	13.5
1539 Hernia, n.e.c.	--	--	--	--
17 Musculoskeletal system and connective tissue diseases and disorders	585	23	1.1	10.8
172 Dorsopathies	70	23	0.1	30.3
1721 Sciatica	--	--	--	--
1729 Dorsopathies, n.e.c.	62	23	0.1	32.1
173 Rheumatism, except the back	514	25	0.9	11.5
1730 Rheumatism, except the back, unspecified	--	--	--	--
1731 Bursitis	18	56	--	59.9
1733 Tendonitis	420	21	0.8	12.6
1734 Tenosynovitis	--	--	--	--
1735 Ganglion/cystic tumor	--	--	--	--
1736 Myositis	--	--	--	--
1739 Rheumatism, except the back, n.e.c.	--	--	--	--

<sup>1</sup> Incidence rates represent the number of injuries and illnesses per 10,000 full-time workers and were calculated as: (N / EH) X 20,000,000 where,

N = number of injuries and illnesses,  
EH = total hours worked by all employees during the calendar year,  
20,000,000 = base for 10,000 full-time equivalent workers (working 40 hours per week, 50 weeks per year).

<sup>2</sup> Days away from work include those which result in days away from work with or without job transfer or restriction.

<sup>3</sup> Includes cases where the nature of injury is: sprains, strains, tears; back pain, hurt back; soreness, pain, hurt, except back; carpal tunnel syndrome; hernia; or musculoskeletal system and connective tissue diseases and disorders and when the event or exposure leading to the injury or illness is: bodily reaction/bending, climbing, crawling, reaching, twisting; overexertion; or repetition. Cases of Raynaud's phenomenon, tarsal tunnel syndrome, and herniated spinal discs are not included. Although these cases may be considered MSD's, the survey classifies these cases in categories that also include non-MSD cases.

NOTE: Dashes indicate data that do not meet publication guidelines or data for incidence rates less than .05 per 10,000 full-time workers. The scientifically selected probability sample used was one of many possible samples, each of which could have produced different estimates. A measure of sampling variability for each estimate is available upon request.
